What Daikin stands for

Daikin is a leading innovator and provider of advanced, high-quality air-conditioning solutions for residential, commercial and industrial applications. As World's Leading Air-conditioning Company, Daikin is committed to delivering air-conditioning solutions that enhance the quality of life all around the world.

A diverse multinational company, Daikin Industries Ltd., active in air-conditioning, chemicals and oil hydraulics, was established in 1924. With headquarters at Osaka, Japan, the Daikin family has more than 84,870 members, working across 100+ production base units and 316 consolidated subsidiaries worldwide. As the world's sole manufacturer that develops a long line of products, from refrigerants to air-conditioners, Daikin advocates comfortable living on the strength of advanced technologies.

Daikin is present in the USA, Canada, Europe, Russia, Middle East, Africa, Central Asia, Southeast Asia, Oceania and Latin America. We aim to serve our customers in each of these markets by providing optimal air-conditioning products.

Our timeline

*Lead Organisation.

We innovate because we care

**WE ARE PROUD TO ANNOUNCE
THAT WE ARE THE WINNER OF THE
GLOBAL COOLING PRIZE (GCP)
TOGETHER WITH NIKKEN SEKKEI LTD.**

The Global Cooling Prize is rallying a global coalition of leaders to solve the critical climate threat that comes from growing demand for residential air conditioning. It encourages harnessing the power of innovation to provide cooling solutions that enhance people's lives without contributing to runaway climate change.

We collaborated with Nikken Sekkei Ltd. to propose a new concept for room air conditioning. The innovation employs a technology that can achieve comfort and energy savings, concurrently ensuring a consistent room temperature and humidity by adequately controlling multiple indoor units in one room. Moreover, it utilises the vaporisation heat of water to further increase the energy efficiency of the equipment. The proposed equipment uses HFO-1234ze(E) refrigerant, which has a low Global Warming Potential (GWP).

KEY ATTRIBUTES OF THE SOLUTION

Proposed low GWP
refrigerant HFO1234ze
with A2L rating

Proprietary swing
compressor technology
used to enhance the
performance efficiency

Control technology with
sensors for measurement of
outdoor and indoor
air conditions

The Global Cooling Prize that we have won is consistent with our 'Environmental Vision 2050', which provides a roadmap for us to reach carbon neutrality by 2050. In line with that vision, we are in a continuous search to reduce energy consumption and refrigerant impact. We continuously strive to examine energy efficiency technology with low GWP refrigerant alternatives to make the planet better and greener.

Innovating for the Next

Engine of growth

MANUFACTURING PLANT

Daikin's manufacturing plant at Neemrana, Rajasthan, aims to create products that will add comfort to the lives of people. It is supported by a network of production bases throughout the world and showcases the application of advanced technology and equipment. Our comprehensive quality control system features centrally computerised management of quality and production data to facilitate high-quality production within scheduled time.

Area*

4,65,537 sq mtrs

Innovating to raise the standards and quality

The Department of Industrial Policy and Promotion (DIPP), Ministry of Commerce and Industry has mandated the Quality Control Order (QCO) for the AC & its related parts as per IS 1391 (Part 2): 2018.

BENEFITS FOR CUSTOMER

The main aim of the QCO is to ensure best quality critical components, which is tested and approved by BIS and follow Indian Standards (IS) for local as well as imported parts related to air conditioners products which are under scope of Quality Control Order.

*Not available for FTHT Series

DAIKIN PRODUCTS ARE OF World Class QUALITY THAT YOU CAN SEE, FEEL AND EXPERIENCE

Our *all Residential Air Conditioners are "BIS" Certified Under License No. 8400163007.

Pushing the Boundaries with Innovation

Daikin innovates relentlessly not just to adapt but also to introduce groundbreaking technologies to the world. It is incessantly on the path to outdo itself to improve the lives of the people and the planet. Be it the Patented Streamer Discharge Technology or the super efficient Inverter Technology, Daikin remains in the forefront to bring a change for good.

While its mission is to contribute to the society by providing the most advanced ACs, it also strives to gain the trust of the people by delivering unmatched customer

satisfaction. Daikin aims to continually add value to foster the trust of the people and the channel partners through research, innovation and continuous development.

Patented Streamer Discharge Technology

GET YOUR AIR 'IMMUNIZED'

Daikin's Streamer Discharge inactivates 99.9% of the novel coronavirus (sars-cov-2)*

"Streamer Discharge" is a type of plasma discharge which generates high speed electrons that combine with oxygen and nitrogen in the air and turn into active species with strong oxidative decomposition power and thereby eliminate allergens such as mould, mites (droppings and dead mites), pollen and hazardous chemical substances such as formaldehyde. Compared to standard plasma discharge (glow discharge), its speed of oxidative decomposition is over 1000 times greater with the same electrical power. The decomposition power is comparable to thermal energy of about 100,000°C.#

MECHANISM OF DECOMPOSITION BY STREAMER

Streamer emits high-speed electrons.

The electrons collide and combine with nitrogen and oxygen in the air to form four kinds of decomposing elements with decomposition power.

The decomposing elements provide decomposition power.

- Testing organization: Okayama University of Science
- Test subject: Novel coronavirus (CoV-2)
- Test result: 99.9% or more inactivation in 3 hours
- Test Method: Irradiating the streamer inside an acrylic box of about 31L
- Report date: 8th July 2020

Note:

*a. This result was obtained by using a Streamer discharge device for testing in lab conditions. The effects of products equipped with Streamer technology or results in actual use environments may differ.

*b. It does not prove the effect against all viruses and bacteria.

#Comparison of oxidation decomposition. This does not mean temperature will become high.

For more information visit: <https://www.daikinindia.com/streamer-technology-to-inactivate-coronaviruses>

Befriending the Environment

Air is something that surrounds us 24 hours a day. In fact, our existence, as well as earth's depends on it. At Daikin, the future of the world's air is our greatest concern. We, the manufacturer of world's best air-conditioners, are always paving the path to save our environment for next generation. We phased out all R-22 model and shifted to the

green refrigerant R-32. Now, whole world is coming together to find and work on way to address global warming issue. We are also offering worldwide free access to patents for equipment using next generation refrigerant, R-32. Refrigerant choice is a key in saving the ozone layer and reducing global warming.

Our all Residential Air Conditioners models manufactured in India use the next-generation refrigerant, R-32.

Taking control of the future with Inverter Technology

WHAT IS INVERTER TECHNOLOGY AND HOW IS IT DIFFERENT FROM NON-INVERTER TECHNOLOGY?

An inverter is a device for converting frequency. The technology is used in many home appliances and controls electric voltage, current and frequency. Inverter air-conditioners vary their cooling/heating capacity by adjusting the power supply frequency of their compressors.

WHAT ARE THE BENEFITS OF INVERTER AIR-CONDITIONERS?

Powerful

Inverter air-conditioners operate at maximum capacity as soon as they start up. As a result, the set temperature can be reached more quickly.

Energy saving

After the indoor temperature approaches the set temperature, inverter control adjusts to low capacity operation to maintain this temperature. This makes inverter models more energy saving than non-inverter models, which must repeatedly start or stop their compressors to maintain the room temperature.

Comfortable

Inverter air-conditioners finely adjust capacity according to changes in the air-conditioning load and the difference between the indoor temperature and set temperature is small. This gives higher comfort level than the non-inverter air-conditioners.

WHAT MAKES DAIKIN'S INVERTER TECHNOLOGY UNIQUE?

Swing compressor

Daikin Air conditioners come with a Patented Swing Compressor which decreases friction and vibration. This helps in a smooth rotation of the swing compressor which provides a quiet and efficient operation. It saves electricity because of low pressure return during compression. The Swing Compressor also prevents leakage of refrigerant gas during compression. Quiet and efficient operation of the Swing Compressor due to low friction and vibration is better than conventional rotary compressor.

Daikin was presented 32nd Chairman's Award by the Japan society for the promotion of the machine industry for swing compressor.

DC inverter

Daikin calls an inverter model that is equipped with a DC motor as DC inverter. A DC motor offers higher efficiency than an AC motor. A DC motor uses the power of magnets to attract and repel to generate rotation. A DC motor that is equipped with powerful neodymium magnets, which enable even greater efficiency, is called a reluctance DC motor.

Recipient of Electric Science Promotion Award
(Reluctance DC motor for compressor)

Reluctance DC motor for compressor

Daikin DC inverter models are equipped with the reluctance DC motor for compressor. The reluctance DC motor uses two different types of torque, neodymium magnet and reluctance torque. This motor saves energy by generating more power with a smaller electric current than AC or conventional DC motors. Daikin's internally embedded neodymium magnet generates strong magnetic field and high torque resulting in high operational efficiency with less electricity consumption. It is more efficient at low frequencies most commonly used by air-conditioners improving efficiency by approximately 20%.

Neodymium magnets are used in the pink-coloured area.

Integral piston of blade and roller

The swing compressor can reduce operational vibration and sound because its piston moves smoothly inside the compressor.

Efficiency of Reluctance DC motor

← Small load
← Low capacity

Large load →
High capacity →

NEODYMIUM MAGNET
10 times
stronger than standard ferrite magnet

Neodymium magnets are approximately 10 times stronger than standard magnets. The use of neodymium magnets in Daikin compressors enhances their performance. Besides, it helps to improve the frequency range used by air-conditioners during periods of stable operation in which air-conditioners operate for the longest periods.

Innovating to Lead

Daikin's constant quest to lead is a philosophy that has been with the company since its inception. Every product that carries the Daikin seal of approval automatically gives the user an unmatched experience.

Highest ISEER

**ISEER
6.2
RATING**

ROLE

Daikin's Integrated Power Module Printed Circuit Board and Patented Swing Compressor Technology are a unique engineering design where the PCB (Controllers) is designed in such a way that it optimizes the cooling effect & also result in higher efficiency. Based on this engineering design we are able to achieve higher ISEER of 6.2, which is 38% more than current 5 star ISEER requirements.

BENEFIT

It saves power; ideal for long usage

It helps in saving more electricity

FUNCTIONALITY

With Daikin's highest ISEER models, you get a product with a rating of 6.2* ISEER, which is best in the 5 star category and is extremely energy efficient. As per BEE standard, the qualifying criteria for 5 star rating AC is of 4.5 ISEER. It ensures that you get the highest performance in the 5 star category.

38% more energy efficiency as compared to 5 star AC with ISEER 4.5

Cools even at 56°C

ISEER
Rating

Patented Streamer Discharge Technology

ROLE

Patented Streamer Discharge Technology eliminates viruses, bacteria, mould as well as hazardous chemical substances and allergens inside the room which cleans the inside air.

FUNCTIONALITY

It is a type of plasma discharge which generates high-speed electrons that combine with oxygen and nitrogen in the air. It then turns into active species with strong oxidative decomposition power, thereby eliminating viruses, bacteria, allergens such as mould, mites (droppings & dead mites), pollen and hazardous chemical substances such as formaldehyde.

BENEFIT

It deactivates viruses and bacteria to make the air clean to deliver peace of mind

It removes pollen and allergens, enabling you to breathe easy

It gets rid of the foul smells and mould to let you breathe purer air

Getting Smarter with IoT

ROLE

The IoT has made an entrance to our homes in the recent years, bringing a revolution of comfort and changing the way people interact with gadgets. It lets you control your Room Air Conditioners through your phone or simply by saying a voice command.

FUNCTIONALITY

Daikin IoT enabled Smart AC connects with Google Home/Alexa via Wi-Fi and also to your smart phone via Daikin India AC Manager app. This enables you to control the AC in a smarter way.

CONFIGURING DAIKIN IOT ENABLED SMART AIR CONDITIONER IS EASY

Download Daikin India AC Manager App from Google Play Store for Android and Apple Store for iOS.

Install the application.

Create your Login ID and set a password.

Switch on your Daikin's IoT enabled smart air AC.

Activate Wi-Fi in your AC.

Connect Daikin India AC Manager Application with your Daikin AC.

Now you can start operating your AC. Enjoy!

To integrate Daikin's IoT enabled smart AC with Google Home or Amazon Alexa:

- Activate your device (Google Home or Amazon Alexa)
- Log into your account
- Connect your device and the Daikin IoT AC through Wi-Fi network and start operating

BENEFIT

Users can control the AC with their voice in Hindi and English

Users have the option to cool down the room before entering through mobile app control

No need to worry about misplacing the remote controller all over the house

It lets you control your AC from anywhere in the world, this app supports multiple languages

Intelligent Eye

ROLE

The Intelligent Eye sensor detects the human movement. If no one is in the room for more than 20 min, the operation automatically changes to energy saving operation by increasing set temperature $+2^{\circ}\text{C}$.

FUNCTIONALITY

In this function, an infrared sensor detects human movement. If no presence is detected in the room for 20 minutes, the energy saving operation will start, and the intelligent Eye Lamp goes off. If human movement is detected again the intelligent Eye lamp lights up and energy saving operation terminates. This operation changes the temperature by $+2^{\circ}\text{C}$ in COOL / $+2^{\circ}\text{C}$ in DRY operation from the set temperature.

BENEFIT

There is no need to constantly turn the AC OFF and ON all the time

Setting of temperature higher ensures more Energy Saving

Reduces wastage of cooling

■ Normal Operation

The Air Conditioner is in normal operation while the sensor is detecting human movement.

■ 20 minutes after, start energy saving operation

The set temperature is shifted in $+2^{\circ}\text{C}$ steps.

■ Back to normal operation

The Air Conditioner will return to normal operation when the sensor detects human movement again.

High Ambient Operation: 56°C

ROLE

We see rising temperatures across various cities in India. Coupled with the urban effect, it is challenging for air conditioners to deliver superior cooling. Most of the air conditioners are designed to deliver cooling at 35°C. Daikin air conditioners are designed to perform at extreme ambient conditions as high as 56°C.

FUNCTIONALITY

The inverter air conditioners runs effectively even when the ambient temperature is on the extreme high end. With patented swing compressor technology and integrated power module smart controllers it keeps cooling your room even at 56°C.

BENEFIT

Ideal for dry and tropical regions of the country

Less influence of outside temperature on cooling

Lower deration effect

*Available in FTKF series.

Dew Clean Technology

ROLE

Dirt, which cannot be removed by the filter, accumulates on the heat exchanger. It becomes a breeding ground for bacteria and moulds and generates a foul odour. The Dew Clean Technology in Daikin ACs auto cleans the heat exchanger, helping get rid of bacteria, moulds and other unwanted particles.

FUNCTIONALITY

The Dew Clean Technology in Air Conditioners auto cleans the coil of Indoor unit heat exchanger. In this function, condensate water volume is used to clean the indoor unit heat exchanger. After cleaning of indoor unit heat exchanger, the condensed water drains out the dust particles, bacteria, mold from the indoor unit coil. After completion, unit will automatically switch to drying operation to dry the heat exchanger. It is recommended to perform this function once in a month for better result.

BENEFIT

Better cleaning of Indoor Unit Heat Exchanger ensures better airflow throughout the year

Consistent cooling performance of air conditioners

Ensure odour-free fresh air all the time

It suppresses mould formation and helps get rid of bacteria

WORKING OF DEW CLEAN TECHNOLOGY

HOW IT OPERATES ?

You can operate Dew Clean Technology function by simply pressing button on remote.

Triple Display

ROLE

The Triple Display Function shows percentage estimation of the power consumed which is done on a real-time basis by our air conditioners unit. It helps the user to track and check the power consumed at that particular time by our AC's. In this function we can also see the set temperature and room temperature of Air Conditioners along with error code.

BENEFIT

With this feature, the consumer can monitor AC power consumption at anytime

It monitors running capacity of AC unit i.e. 1.5 TR machine's power consumption display showing 50% means running capacity = 0.75 TR

FUNCTIONALITY

Each press of the display button on remote will enable the user to see estimated Power Consumption percentage on a real time basis, Indoor Temperature Display and Set Temperature Display Respectively, this function allows users to see and monitor the approx. power saving and also to maintain the comfortable room temperature as per their requirement.

Daikin Inverter Technology ensures your ac runs at optimum capacity as desired

With this feature consumer can see indoor temperature and set temperature along with error code

Note - Daikin Inverter Technology ensures your AC runs at optimum capacity as desired.

Anti-Corrosion Treatment

ROLE

The Benzotriazole Oil prevents the heat exchanger from corrosion thus ensuring it lasts longer to deliver optimum cooling for long time. With this, the corrosion of copper is delayed by up to 2.8 times.

FUNCTIONALITY

In Anti-Corrosion Treatment Function, a special coating of Benzotriazole oil is added to the copper coil to prevent corrosion. The treatment reduces the effect of nitric and acidic acid reaction on the copper coil of indoor & outdoor units. It is especially effective against the Indian climate conditions – rainy season, high humid area, coastal area and industrial smokes & pollutants areas.

BENEFIT

Longer life of copper coil and air conditioners due to lowering corrosion impact

Durability of copper coil indoor & outdoor unit extends the lifetime of air conditioners by making the indoor & outdoor coil corrosion resistant

Powerful Air Throw

CROSS FLOW EVAPORATOR FANS

With the Cross Flow Evaporator Fans, Daikin Air Conditioners ensure uniform cooling and a powerful air-flow that allows one to receive the cool air up to 16 meters* (**52 Feet**) away from the unit.

The unique Cross Flow Evaporator Fans and Power-air flow Dual Flaps help in cooling down all sorts of spaces, big and small. Moreover, they help ensure uniform cooling delivering peace of mind.

*Above given value is for 5kW (1.5 TR Capacity models) Inverter & Non Inverter model, air flow may vary model to model.

Innovative Products that Delight

Every appliance that goes through Daikin's manufacturing lines is a product of years of R&D.
Every product is perfected and re-perfected to ensure they deliver and carry the badge of trust.

Inverter (Split) Air Conditioners

The Inverter ACs from Daikin are a testament of the aspirations and innovation we carry out.
This technology lowers the speed of the compressor once the room gets cool not only to save power but also to save the planet.

Piping Connection		Gas / Liquid	mm (Inch)	Φ12.7/Φ6.4 (1/2"/1/4")
Operating Ambient Temperature Range		Cooling (Min~Max)	°C DB	20~52

Measurement conditions:

- Cooling capacity is based on: indoor temp. 27°C DB, 19°C WB; outdoor temp. 35°C DB, piping length 5 m.
- Sound levels are based on temperature conditions 1. above with 5m piping length. These are anechoic conversion values. These values are normally somewhat higher during actual operation as a result of ambient conditions.

Cooling and heating capacities above are rounded off to first decimal. 1TR (Ton of Refrigeration) = ~3.517 kilowatt.

*Star Rating mentioned above is as per norms defined by Bureau of Energy Efficiency, Ministry of Power, Government of India.

* Value given in Inch. *As per Continuing Policy of Product Innovation at Daikin, The Design, Technical Specifications, Features, Look may change without prior notice.

Compressor Type			Swing Compressor	Swing Compressor	Swing Compressor	
Refrigerant			R-32	R-32	R-32	
Breaker Size		A	15	20	20	
Piping Length	Charge-Less	m	10	10	10	
	Max. Length		15	20	25	
	Max. Height		12	16	20	
Piping Connection		Gas / Liquid	mm (Inch)	Φ9.5/φ6.4 (3/8"/1/4")	Φ12.7/φ6.4 (1/2"/1/4")	Φ12.7/φ6.4 (1/2"/1/4")
Operating Ambient Temperature Range		Cooling (Min~Max)	°C DB	20~54	20~54	20~54

Measurement conditions:

1. Cooling capacity is based on: indoor temp. 27°C DB, 19°C WB; outdoor temp. 35°C DB, piping length 5 m.
2. Sound levels are based on temperature conditions 1. above with 5m piping length. These are anechoic conversion values. These values are normally somewhat higher during actual operation as a result of ambient conditions.
Cooling and heating capacities above are rounded off to first decimal. 1TR (Ton of Refrigeration) = ~3.517 kilowatt.
*Star Rating mentioned above is as per norms defined by Bureau of Energy Efficiency, Ministry of Power, Government of India.
* Value given in Inch. *As per Continuing Policy of Product Innovation at Daikin, The Design, Technical Specifications, Features, Look may change without prior notice.

Voice of Customer

Aashray Arora
Architect

"Daikin ACs circulate air at every corner and it not only cools the air but also cleanses the air which is good for my children. Daikin is a company with Tech in its DNA."

"It's high time we thought about climate change and we have to take care of mother nature. With Daikin green refrigerant technology AC, I decided to buy Daikin for my every room. Daikin really cares about the environment and helps in better cooling."

Ayushi Goyal
Documentary Producer

Sheeba
Home Maker

"Brand value matters to me. We have had Daikin ACs from the beginning. My family doesn't feel sick at home. Daikin has also been appreciated by the government for its innovative products. Daikin is undoubtedly the global leader."

"Daikin really has cool features and it's the best when it comes to technology. Swing compressor provides quiet and efficient operation throughout the day. Japanese technology makes sound and advanced technology products. Daikin has no match in this industry."

Abhinav Sharma
Engineer

Manorama
Paediatrician

"I was looking for an AC which provides clean and cool air; Daikin ACs with the Patented Streamer Discharge technology removes viruses and bacteria and provides a clean and protected environment inside the home. What better could a mother ask for, which Daikin provides?"

All Reasons to Bring Daikin Home

From innovations that set us apart to the inventions that change the lives of people, every Daikin product goes through rigorous testing to get our seal of approval. Every journey of a product from the assembly lines to the homes of people is a result of years of labour with an unwavering aim to improve the quality of life and make the planet better.

10 years warranty*
on Compressor

Long term assurance

Provides tension-free comfort for a decade

5 years warranty*
on PCB (Printed Circuit Board)

Additional peace of mind

Gives extra assurance on the maintenance cost

Dew Clean Technology

Cleans the heat exchanger automatically

Ensures hygiene & maintains clog-free heat exchanger for a better airflow

ISEER 6.2
Highest ISEER

Higher efficiency

38% more energy efficiency as compared to 5 star AC with ISEER 4.5

*Applicable for FTKF35 model

Triple Display
(on Indoor unit)

Power Consumption, Set/Room Temperature & Auto Error code

Complete monitoring control in the hands of consumer

Patented Swing Inverter Compressor

Energy & money savings

Faster cooling with low operating sound

R-32 Green Refrigerant

Zero ozone depletion

Better cooling in high ambient temperatures

Stabilizer Inside Operation

No worry on voltage fluctuation

Regulate voltage across a wide range of fluctuation (130V~285V) Smooth operations during voltage fluctuations

Stabilizer Free Operation

Low cost maintenance

Wide operation range (160V~264 V)

Good Sleep Off Timer

Assured comfortable sleep

Set temperature increases by 0.5°C in 30 minutes interval

3D Airflow

Uniform cooling at every corner

It ensures steady air circulation to deliver even cooling and unmatched comfort

Coanda Airflow

Even airflow distribution to every corner of the room

Optimise flap position of the indoor unit for radiant cooling

*Applicable for inverter models only.

Dry Function

Automatic dehumidification

Enhanced comfort by reducing excessive humidity

Patented Streamer Discharge

Plasma discharge decomposes viruses¹, bacteria¹ and harmful gases¹

Clean and healthy airflow

High Ambient Operation

Operation at high ambient temperatures up to 56°C[#]

Comfortable cooling even at extreme conditions

[#]Applicable for FTKF series

Anti-Corrosion Treatment

Ensuring long life

With a special coating, it prevents the rusting of the copper coil

Mobile App Controlled

Control from any corner of the world

Easy accessibility through mobile app

Voice Controlled Air-conditioning

An AC that listens to your command

Voice controlled via Alexa/Google Home

Smell Proof Operation

Fresh air supply all time

Indoor heat exchanger is cooled by fan

High Impact Polystyrene IDU Material

Lasting fresh and new look, year after year

Best-in-class indoor unit casing material (HIPS)

Outdoor Power Supply

Protection against fire accident

No overheating of main cable inside room

Intelligent Eye

Adjusted cooling according to human presence

Energy saving when room is empty

Econo Mode

Reduces energy consumption

Optimises cooling capacity

Power Chill Operation

Fast cooling than normal mode

Immediate relief from hot temperature

Auto Error Code Display

Auto error detection in the remote

AC issues identification no longer require technician expertise

Installation Kit

2 times stronger XLPE insulation kit

Enhanced heat withstanding capacity of 120°C

Advance Anti Corrosion

Durable parts for all regions

(seashore, industrial area, etc.)
All parts are coated with Advance anti corrosion material

Inner Grooved Pipe

Oscillatory refrigerant motion

Better heat dissipation, strengthening AC's performance
